Office Action Summary	Application No.	Applicant(s)
	10/730,990	COOPER, RICHARD CHARLES GORDON
	Examiner Michael C Astorino	Art Unit 3736

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 10 December 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-18 is/are pending in the application.
 - 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-18 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent Number 5,692,500 A.

In regards to Claim 1, and with respect to claims 9, 10, 11, 12, 13, 14, 15, 16, 17 and 18.

An apparatus for assessing psychological state, the apparatus comprising,

a measurement device, the measurement device comprising a scale defining a range of values and an indicator to mark a position on said scale (figure 2).

However, Gaston-Johansson discloses the claimed invention except for the specific arrangement and/or content of indicia (printed matter) set forth in the claim(s). In the claims set forth by the applicant the print matter is specific to the "manual" and those claims which directly refer to the manual or the manual's use, claims 9, 10, 11, 12, 13, 14, 15, 16, 17 and 18.

a manual, the manual comprising instructions for the use of the device and the manual further comprising a written description of a series of events or experiences each of which is assigned a value.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to include the manual since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it has been held that when the claimed printed matter is not functionally related to the substrate it will not distinguish the invention from the prior art in terms of patentability. *In re Gulack*, 217 USPQ 401, (CAFC 1983). The fact that the content of the printed matter placed on the substrate may render the device more convenient by providing an individual with a specific type of manual does not alter the functional relationship. Mere support by the substrate for the printed matter is not the kind of functional relationship necessary for patentability. Thus, there is no novel and unobvious functional relationship between the printed matter e.g. the manual and the substrate e.g. the measurement device which is required for patentability.

Claim 2. The apparatus according to claim 1 wherein said measurement device further comprises a support means (52, 54, 42 figure 4) comprising the scale defining a range of values.

Claim 3. The apparatus according to claim 2 wherein said device further comprises a stand alone base (12 base).

Claim 4. The apparatus according to claim 2 wherein said device is mountable on a wall. It is inherent that the device (12 base is mountable on a wall).

Claim 5. The apparatus according to claim 2 wherein said scale is a graduated numerical scale.

(40 scale). Additionally, 40 scale is relevant to claims 15 and 18 as well.

Claim 6. The apparatus according to claim 2 wherein said scale is not numerical (see emotional and sensory pain descriptors). Additionally, emotional and sensory pain descriptors are relevant to claims 14 and 17 as well.

Claim 7. The apparatus according to claim 2 wherein said scale is a combination of numerical and non-numerical indicia. (40 scale, emotional and sensory pain descriptors)

Claim 8. The apparatus according to claim 2 wherein said indicator is re-positionable. (40 scale)

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McGrath et al., "A new analogue scale for assessing children's pain: an initial validation study", Elsevier Science B.V. Pain 64 (1996) p435-443.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C Astorino whose telephone number is 703-306-9067. The examiner can normally be reached on Monday-Friday, 10:00AM to 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (703) 308-3130. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
